RUANG LINGKUP PERIKANAN TANGKAP

Segala bentuk pengumpulan ikan di laut dengan menggunakan alat tangkap perikanan.

SCOPE OF CAPTURE FISHERY

All forms of capturing fish from the sea using fishing gear.

RUANG LINGKUP PERIKANAN BUDIDAYA

Ruang lingkup perikanan budidaya mencakup sistem pembesaran biota yang bibitnya dan bukan dari alam, tanpa bahan kimia ilegal, dan tanpa mengkonversi habitat yang dilindungi.

SCOPE OF AQUACULTURE

The scope of aquaculture includes a system for rearing fish commodities with non-natural fish seeds, illegal chemicals, nor converting protected habitats.

Daftar ini dibuat berdasarkan hasil penilaian berbasis ekosistem pada Desember 2021. Kategori pada setiap jenis ikan dapat berubah seiring waktu berdasarkan penilaian terbaru.

Tidak dapat menemukan ikan yang Anda cari?

Lihat www.seafoodsavers.org, www.msc.org, atau www.asc-aqua.org.

Hindari mengonsumsi telur ikan dan ikan ukuran anakan.

Hindari mengonsumsi ikan yang diproduksi dengan cara yang melanggar hukum.

This list is based on ecosystem-based approach assessment December 2021.
Categories for each type of fish may change over time based on the most recent assessment.

Can't find the fish you're looking for?

See www.seafoodsavers.org, www.msc.org, or www.asc-aqua.org.

Avoid eating wild-caught fish roe and juvenile fish.
Avoid consuming illegally produced fishes.
